THE LAST MOVIE

NEW 4K RESTORATION

Dennis Hopper's legendarily career-imperiling production of *The Last Movie* emerges in theaters at last. Hopper stars as a stuntman working on the set of a western shooting in rural Peru, where the locals begin to absorb the action of the shoot into their ritual and folklore, and cinema melts into life itself.

"The representational fissures of cinema – the tension between the real and the imaginary, between imitation and inspiration – have been woven into its very fabric."
– Bilge Ebiri, *Village Voice*

Sponsored by the Program in the Arts of the Moving Image (AMI)
